Sophisticated purity for your modular kitchen

Adora

RO+UV Under-the-counter Water Purifier

Colour variant

Double layered RO+UV protection

Under-the-counter

6 stage purification

8 litres storage

Aqua Taste Booster (ATB)

Hydrostatic pressurized dispensing

Elegant SS goose-neck faucet

UV fail alert

Dimensions (inches)
11.8 (W) x 7.8 (D) x 16.5 (H)

Alkaline Antioxidant Water (with added minerals)

Some of Blue Star's water purifiers are equipped with Alkaline Antioxidant Water (with added minerals) which provides alkaline antioxidant water that strengthens the defense mechanism of the human body thereby enhancing immunity and helping the body to stay healthy and function perfectly.

This technology enhances the pH of water making it alkaline which helps in neutralizing the high acidic levels of your body, keeping you healthy. Alkaline water also has various types of naturally ionized minerals and enables washing away disease-forming toxins. Keeping our bodies in a more alkaline state will boost the immune system.

Water with this technology is abundant in alkaline minerals and hydrogen which help the balance of metabolism. It can help in boosting your immunity and keeping you away from the diseases by nourishing the body with clean, wholesome ingredients adding essential minerals, raising the pH and decreasing the oxidation potential making the water antioxidant.

Opt for Blue Star water purifiers with Alkaline Antioxidant Water (with added minerals) that not only gives you pure water but great immunity as well. Get armed with immunity !
